

## **Community Support Program Services**

Agencies are required to obtain a Wisconsin DHS certificate to provide community support program services as authorized under HFS 63, Wis. Admin. Code (which meets Wisconsin Medicaid's HFS 105, Wis. Admin. Code).

Agencies that do not meet this criteria will qualify as a 'biller only' provider and will be allowed to bill for community support program services. An allowable Medicaid rendering provider is required to perform the service.

The billing agency is required to make available the nonfederal share needed to provider CSP services.
